

Sagar P. Chavda

SOFTWARE ENGINEER | .NET DEVELOPER

Ahmedabad, Gujarat, India | +91 8200123173 | sagarchavada80@gmail.com | linkedin.com/in/sagarchavada

PROFESSIONAL SUMMARY

Software Engineer with 4 years of experience designing and delivering scalable backend systems using C# and ASP.NET Core. Skilled in building secure REST APIs, optimizing SQL databases, and implementing cloud-native serverless architectures on AWS and Azure. Applies SOLID principles, clean architecture, and dependency injection to build testable, maintainable backend applications across legal tech and healthcare domains.

TECHNICAL SKILLS

Programming Languages: C#, LINQ, JavaScript

Frameworks: .NET 6, ASP.NET Core, Web API, ASP.NET MVC, Angular

Databases: MS SQL Server, PostgreSQL, Entity Framework Core

Cloud: AWS Lambda, Azure Functions, Azure Logic Apps, IIS Server

Messaging: RabbitMQ

Architecture: SOLID Principles, Clean Architecture, Repository Pattern, Dependency Injection

Authentication: JWT Authentication, ASP.NET Core Identity

DevOps: CI/CD, Azure DevOps (TFS)

Tools: Git, Jira, Swagger, Redis

WORK EXPERIENCE

Casepoint Pvt. Ltd.

Software Engineer

Surat, Gujarat
May 2025 – Present

Project: eDiscovery Platform

Enterprise cloud-based legal tech portal handling terabytes of electronically stored information (ESI) for litigation and compliance.

- Engineered REST APIs using ASP.NET Core to handle legal document workflows across distributed systems, improving module execution efficiency by 30%.
- Designed a Redis caching layer to reduce database read frequency, decreasing average API response latency from 350ms to 80ms.
- Implemented an asynchronous pipeline using RabbitMQ to process background workloads, achieving 99.99% message delivery reliability across concurrent transactions.
- Optimized database queries using PostgreSQL and LINQ to reduce search execution times by 25% across case management modules.
- Automated integration workflows by configuring Azure DevOps CI/CD pipelines, reducing manual deployment steps and errors by 50%.

Metizsoft Solutions Pvt. Ltd.

Software Engineer

Ahmedabad, Gujarat
Jan 2024 – Mar 2025

Project: Parking Enforcement System (Roker Enforcement)

Smart parking management and enforcement platform for municipal compliance.

- Migrated serverless compute workloads from Azure Functions to AWS Lambda, optimizing cloud infrastructure and reducing operational hosting costs by 20%.
- Refactored core backend services using C# to improve service responsiveness, enhancing API response rates by 15% across municipal systems.

Shine Infosoft

Junior Software Engineer

Ahmedabad, Gujarat
May 2022 – Dec 2023

Project: Caregiver Management System (Shiftware)

Healthcare booking & staffing portal streamlining scheduling and incident management.

- Designed relational schemas using Entity Framework Core to manage caregiver schedules, reducing overall booking processing latency by 30%.
- Integrated token-based security modules using JWT Authentication to secure patient records, protecting data access for 5K+ monthly active users.

Project: Document Management System (DMS)

Centralized secure document storage, indexing, and sharing portal.

- Engineered secure file storage features using ASP.NET MVC to support multi-format indexing, improving document retrieval efficiency by 40%.
- Configured web application deployments on IIS Server environments, implementing role-based access control to achieve 100% compliance during security audits.

EDUCATION

Bachelor of Computer Applications (BCA)

S.S. Institute of Information Technology, Gujarat

2022
